Help

Although video games are a way of escaping reality for many of us, it's also a fact that there are tons of games that simulate real-life activities. Simulators have a lot of fans, and fishing titles are one of the favorite genres of them all. That's why we've chosen to put together the best fishing games available on Android. It's not all about simulators though; to add some more variety to the list, we've selected all sorts of titles related to fishing.

Fishing HookThe truth is that this game couldn't have a more obvious name. Here your mission is to adventure out on the water and try to catch as many fish as possible. Its gameplay is typical for the fishing genre: you have to reel in your fish by touching a button. The constant pull and release is essential so you don't pull the line too hard or the fish will escape. It can get a little repetitive over time, but it does offer enough variety of different types of fish to make it more interesting.

[Download]Fishing LifeFishing is an activity that can be highly relaxing for many people. This feeling is perfectly recreated in Fishing Life through very nice visuals and a soundtrack that matches the gameplay. More specifically, in this title we will visit the hometown of a man who spends hours aboard his small boat. While watching sunsets we will gradually improve the rod, the line and the boat to catch dozens of fish.

[Download]Hooked Inc. Fisher TycoonLion Studios is a total expert in creating fun and simple games. And those two qualities are exactly what you'll find in the colorful Hooked Inc, which offers a casual approach to fishing. Your adventures aboard a boat with your fishing pole serve as the theme in this addictive idle clicker. That said, instead of tapping the screen like crazy, you simply have to slide your finger around to catch the fish you see in the water. Careful with this one though — it's hard not to get hooked.

[Download]The FishercatNot only humans are able to demonstrate their fishing skills. In The Fishercat we meet a clever cat that uses its agility to catch a variety of species. And it does not do it with a traditional rod, but rather dives into the depths of the sea and uses a harpoon to catch many fish. However, the oxygen tank will have a time limit, so we will have to be very fast to make the most of our stay at the bottom of the sea.

[Download]Desert Island FishingOk, so we're hopeless. We see a game with a retro look, and we can't help but fall in love. But Desert Island Fishing is much more than an ode to the past, given that it's a fishing game that's as simple as it is entertaining. Its gameplay is based on tapping the screen at certain times, but the best part is its enormous number of unlockables. You'll discover new characters and locations as you play. Plus, it's hard to resist its chiptune music.

[Download]Rapala FishingWhile most fishing games are based on what happens outside the water, Rapala Fishing takes you down into the depths. After choosing the area where you want to fish, you have to move the hook so that the fish will bite. It has a more complex game style, but this is exactly what made it stand out from its peers. It offers tons of different settings to fish in and all sorts of fish and equipment.

[Download]Go Fish!We don't have enough fingers on our hands to count all the clones and games that are similar to Ridiculous Fishing. Go Fish! clearly enters into this category, but we've selected it for its graphics and simple concept. Your objective includes catching as many fish as possible, and you just have to move your finger around the screen to do so.

[Download]Real Monster Fishing 2019More than 250 fish await you in Real Monster Fishing 2019, an incredibly entertaining fishing game. This title takes you back to the simple gameplay of pull and release using a button, but this doesn't make it any less fun. You have an enormous catalog of equipment, fish, and locations where you can get to work.

[Download]Fishing SeasonIn keeping with the previous title, we also find Fishing Season. The Nexelon studio invites us to the vicinity of a river to catch as many fish as we can. Under a gameplay based on "quick-time events", we will be in charge of getting our rod ready to cast the hook at the perfect moment. This way we will be able to catch fish faithfully represented by 3D graphics. In addition, the title also offers us a vertical perspective of the interface so that we can complete the processes with only one hand.

[Download]A Girl AdriftThe premise of A Girl Adrift is based on the wreck of a girl in the middle of the ocean. The main character of this Daerisoft game is in danger and only by catching numerous fish will she be able to survive aboard a wooden raft. This RPG combines a careful narrative with fishing and will introduce us to charming characters that we will discover as we advance through the sea. As we collect water species, we will improve the conditions of the boat until the young girl reaches land safely.

[Download]Pokemon: Magikarp JumpThis is one of our favorite Pokémon games available on Android. Fishing isn't the heart of the game, but it's one of the mechanics that you'll have to use to become the best Magikarps trainer. The title is great and The Pokemon Company made a very smart decision in choosing one of the internet's favorite Pokémon characters to star in it.

[Download]Ultimate Fishing SimulatorIt's time to get serious. Ultimate Fishing Simulator may be the best fishing simulator that exists on Android. It's a title that will make anyone happy who's looking for a more realistic concept. The graphics are pretty good and it has 12 real locations where you can take your fishing pole. That said, learning how to fish correctly is a bit tricky.

[Download]Fishing ClashCatching fish of all different colors and flavors turns into a lively experience in Fishing Clash. You have to try to maintain the tension meter in the middle to get the best score possible. There's no much more to do than this, but there is something especially fun about discovering new fish all the time. As usual in these types of games, you can put the fish in an aquarium or let them go.

[Download]Fishing StrikeWhether you like fishing games or not, it's hard not to have fun playing Fishing Strike. The creation from Netmarble stands out for offering a complete experience without compromising its simplicity. Fishing becomes a total battle where you can use wacky power-ups in order to help you catch the fish you need. It's a great game in all respects. If it were a movie, it would be directed by Michael Bay.

[Download]Tides: A Fishing GameIn Tides: A Fishing Game we find a striking universe inspired by Animal Crossing. In this game, we will guide the steps of our character along an extensive 3D island. Fishing lots of fish will be essential if we want to get totems that will allow us to improve our settlement on the island. As a trick, selecting a suitable angle for the rod is one of the important aspects if we want the fish to take the bait as soon as possible.

[Download]Humans have been fishing for as long as we've existed. We do it for sport, for recreation, and many still do it for food. In this day and age, not everyone has the time to pack up their gear and head out to the nearest lake or river. The good news is that those people still have some options if they want to catch some fish, although we admit it'll never be as good as the real thing. Here are the best fishing games on Android.

The best fishing games for Android 3DCARP is one of the few pay-once fishing games. It features eight lakes and four rivers where you can catch up to 28 different varieties of fish. There are a ton of minor details that set this game apart from its peers. Certain fish will jump out of the water once hooked, you can use bait boats, and even climb trees to help you find more fish. It's not the most popular fishing game out there. However, it seems like one of the most solid fishing games available right now. Just make sure you try it out before the refund period ends because the game hasn't seen an update since 2018 so bugs may never get fixed.

See also: The best fishing apps for AndroidAce Fishing is one of the most popular fishing games out there. The features for this one include the ability to customize your fishing tackle, travel to a variety of places, catch a variety of fish, and more. There is also a global leaderboard to see how your catches compare to the world. Catching a fish isn't particularly difficult, but the mechanics are fun. There are even a couple of basic fishing tactics required to catch fish. It is a freemium game. That is by far the worst thing about it. Fishing Break is a simpler fishing game. In this one, players will be catching hundreds of different fish from eight different locations. You'll also have achievements to earn, leaderboards to climb, and quick, but challenging gameplay. The graphics are simple, but that's okay. In fact, realism might actually make this game worse. It's the kind of game you play while waiting in line at the store or for commercials to end. As long as you don't mind that, it's a fun game. Fishing Hook is one of those fishing games that tries to focus on realism. It's a fairly basic game at its core. You'll spend most of your time out on a virtual boat with your line in the water. The mechanics are a little weird. They aren't overly difficult, though. The game also features challenge fish, achievements, rankings, and support for up to 16 languages. It has some unusual bugs regarding permissions and the Galaxy Note 5. However, for most, it should be a positive experience. See also: The best simulation games for Android Hooked Inc is an idle clicker game with a fishing theme. You start by tapping the screen to catch as many fish as you can. You can upgrade your boat as you catch them in order to catch more fish. It's honestly not all that different from a normal idle clicker, but the fish theme is nice for fishing fans. Some other features include rare fish to find, various crew and ship upgrades that help you more efficiently catch fish, and some seasonal stuff to help keep it fresh. It's a pretty chill game and the microtransactions aren't horrible. Let's Fish is one of the bigger fishing games. It features over 60 locations and 650 species of fish. There is also a ton of fishing tackle to collect and use. Unlike most, this game also features an online multiplayer mode. That does include the usual things like leaderboards. However, it also includes a PvP fishing duel mode as well. It's something a little bit different from most. The downside is that it's a freemium game. That means the PvP is probably a little bit pay-to-win. It's a strong showing overall as long as you don't mind the freemium stuff. See also: The best Android multiplayer games Master Bass Angler is one of the better arcade fishing games. Unlike simulators, it doesn't make you wait very long to do things. Fish bite practically right after you cast the line. The game features several locations from around the United States, various upgrades to your equipment, and more. It also has no registration required. The freemium strategy is actually really nice with this one. It has an energy system and advertising. However, you can eliminate both with a single in-app purchase. That's a lot better than having to do it more than once. There is also an online multiplayer. Monster Fishing is an arcade fishing game that has you catching fish. You cast your line out, get a bit, and then fight the fish until you get it in. There are also various treasures and relics you can uncover while fishing along with equipment upgrades to make things easier. The one-touch controls are pretty easy to figure out and the game is also playable offline. It's certainly not perfect, but you can definitely do worse when it comes to free to play fishing games. My Fishing World is one of the most beautiful fishing games on the list. It boasts realistic fishing locations, day and night cycles, and a simple enough game UI for just about everybody. Additionally, you can unlock a bunch of tackle and even chat with other players online while you fish. It's fairly evident that the game's looks are a major attraction here but the gameplay isn't half bad either. Just watch out for the free to play elements and you should enjoy this one. See also: The best sports games for Android Rapala Fishing is an arcade-style fishing game developed by Concrete Software along with Rapala. It aims for a more realistic experience. It's not perfect, but it doesn't do badly either. You'll also get to play as often as you want. The developers boast that there are no energy bars, timers, or anything like that. It's still a freemium game, though, so don't think you're getting off too easy. There are also daily tournaments, various activities, and other things to do. If we missed any of the best fishing games, tell us about them in the comments.
